so every one else and there was all around the expression of juhilant satisfaction from those particular porsons who were on hand to see it. And they went away with the determination to do a great deal of crowing over the ones who had stayed

COMETIC ELECTRIC STORMS. Norwegian Observer Far North Detected

Them Before and After Transit. provid Cuble Desputch to THE SUS CREISTIANIA, May 21. - Prof. Birkeland. who visited Finmark, in the extreme borth of Norway, for the purpose of observing Halley's comet, reports that when the come! passed the sun he observed a magnetic storm of extraordinary strength. while for days before the transit the atmospheris conditions were exceedingly outet, as they have been since.

He obtained excellent magnetograms and earth current curves during the storm, and he also made valuable electric and meteorological observations. He could not observe the sun owing to

the weather being cloudy. He is of the opinion that the phenomena observed were due to the tail of the comet. which he says must consist principally

of somewort of electrical rays

NO COMET IN CHICAGO. Clouds Present Observations-Loss of the

Tail Theory Discussed. CHICAGO, May 21 .- All observations of the comet and its tail were prevented by cloudiness which prevailed here during the afternoon and evening. The comet to-morrow night ill probably not be well observed until Monday night Prof. Frost, director of the Yerkes Observatory, said to-day that

have ceased its activity in producing a tail, as did Borelli's comet in 1903 "

The theory that the comet is now generating a new tail was advanced by the night with Brother Ignatius, that the Rev Daniel J. McHugh professor of astronomy at De Pauw University, to-day The old rail was forced away from the comet by the force of unusual electrical repulsion caused by the sun spots which at that time that it could not reach were so prominent on Wednesday, he

It is my ophnion," said Prof. McHugh that the comer lost its tail on Wednesday night. There are records of its having dope the same thing in 1835 and it is also Comet on View Nearly Two Hoursbelieved that its tail was fost in March of this year. I believe that there is not the slightest chance of the earth coming in contact with the tail on this visit."

Observations made in California, according to reports by telegraph, by the fifteen degrees, broadening at the end.
The same sight was noticed by Prof. W. J.
Hussey of the University of Michigan at
Ann Arbor. This morning Prof. Edward remnant of a cometary tail

he mystery has quite vanished," Prof. Barnard to-day. "If we had taken time to think there might not have so much mystery at first, when we saw the tail in the east after the had passed the sun into the western aky. I was puzzled then, but now I see that the mystery was due entirely to the curve in the tail. We ought to see the curve soon, but it is not yet turned toward

is. We are now looking across it.—
"Whether we have passed through the tail will have to be determined bylong calculations after we have gathered more data about the curve."

NO COMEJ BY BALLOON ROUTE. Prof. Todd Makes a Record Voyage, but Theory in South Africa That the Earth Fails to See Visitor in the Skies.

AMHERST, Mass., May 21. - The longest landed her passengers safely at St. tory. Hyacinthe, Que , thirty-six miles southeast of Montreal, at 6 23 o'clock this morning. The balloon travelled a distance of more than 200 miles in an air line and was in the air 11 hours and 52 minutes reached an altitude of 11,000 feet.

This information was received by telephone to-day by Mrs Mabel L Todd whose husband, Prof David A Todd of with three companions, A. Leo Stevens, at present pilot: Charles Somerville of New York and H. P. Sherman of London, a Williams Boardwalkers Coukin't Make Head or College unior

The aeronauts were unsuccessful in the principal object of the trip-an observation of Halley's comet. The atmosphere was hazy and the light diffused through the most by the moon made it impossible to catch a glimpse of either the nucleus or the tail. Prof. Todd carried instruments that included a large portable telescope and a device of his own inventional control of the tion by which the aeronauts are warned of the ascending or decsending of the balloon by an electric bell.

This voyage makes the balloon a claim-ant for two cups, one offered by a news-paper of Montreal for the New England paper of Montreal for the balloon landing nearest to that city and she other by Cortlandt Field Bishop of the Aero Club of America for the New England balloon making the longest flight e previous long flight record was made William Vansleet, who covered a distance of 165 miles last summer, from North Adams to Topsham. Me

COMET SEEN IN WASHINGTON. When Viewed With the Naked Eye It Was Dim and No Tall Was Visible.

WASHINGTON, May 21. The cornet was visible to the naked eye here at short Leaves for Washington Prepared to Call intervals between 8 and 8:30 o'clock to-night togtit is doubtful if many persons other than the observers at the Naval Observatory saw it. By 8:30 o'clock the clouds had become so heavy in the northwest that the astronomers no longer ably will be a statement made on the could view the visitor with their glasses. floor of the Senate defending himself the comet when seen without the aid of from the charges of bribery at his elecglasses early in the evening was dim and no tail was visible to the eye. The comet was a little north of due west

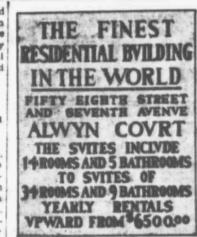

TAIL LAGGING REHIND. Prof. Wendell Saw Comet's Appendage

in the East on Friday. CAMBRIDGE, Mass., May 21 .- Prof. O. C. Wendell of the Harvard Observatory eaid this afternoon that the band of light charge, comes up for a hearing. If the which the local astronomers saw early on Friday morning was indoubtedly the tail of Halley's comet. None of the pro-Mexico: Joel H Metcaife of Tacubaya, and make a public steement, which will be published here about the time counsel in Judge McSurely's court is engaged in selecting a jury.

Arbor Observatory all have telegraphed.

Washingron, May 21.—Senator Lorithe local astronomers that they saw the comer's full on fixed propring and their mer of Illinois will, if he carries out his comer's full on fixed propring and their mer of Illinois will, if he carries out his comer's full on fixed propring and their mer of Illinois will, if he carries out his save that since P. the part of a laggard. Prof. Wendell says the observations he made Friday morning convince him that he was viewing the edge of the comet's tail

COMET ON TIME AT ST. LOUIS.

Tail Pointing Toward the Moon. St. Louis, May 21.-Promptly on all, and remained on exhibition fully two the New Jersey reformer, William Barhours. The Rev. Father Martin S. Brennan reported finding the comet at 7:50 engineer of the Hudson funnels. P M. shining brilliantly, with a well developed tail. It shone at its best at 8:30. he cays and will be even a better sight

Brother Hubert of the Christian Brothers College picked up the comet at around the model observing its workings. 7:40 P. M. and kept it in view nearly two the Yerkes Observatory, said to-day that he considered the theory that the comet had ceased to create a tail quite possible.

I have been considering the theory carefully, said Prof. Frost, "and I regard it as likely that the comet may have ceased its activity in producing a heavy coased its activity in producing a least to the comet to the comet had an inclination of from seven to ten degrees from a horizontal direction and an elevation above the horizon of 17 degrees 7 minutes. The comet's tail, he said, pointed toward the southeast,

directly toward the moon. Brother Hubert asserts positively, as a esult of his observations made on Friday night with Brother ignatius, that the earth passed through the comet's tail on Friday night instead of Wednesday night, as was predicted. He says he was con-vinced Wednesday morning from the angle at which the comet's tail appeared earth before Friday and these calculations prove accurate, as the earth undoubted passed the comet's tail on Friday night.

FINE VIEW IN INCHMOND.

Negroes Pray Fersently for Salvation.

RICHMOND, Va., May 21.-For nearly two hours this evening Halley's comet was visible to the naked eye in the southwest heavens, coming first into view shortly after the setting of the sun and Mount Wilson astronomers appearing above and southwest of the showed that the tait was spread faintly star Aldebaran. It became gradually behind the head for a distance of ten or brighter up until about 8:45 o'clock, when its radiance began to gradually fade, finally disappearing entirely at 9:15.

Not only the head of the comet but the tail, which seemed to envelop the head Barnard was unable to: find anything tail, which seemed to envelop the head the eastern sky that looked like the and to stream out in a curve toward the south, was easily distinguishable, Thou-sands of people were out for a look, and sands of people were out for a look, and excitement ran high among the blacks, many of whom thought that the end of the world had come "for suah." In many places they collected and offered up prayers, each praying fervently for his or her individual salvation. Even after the comet had disappeared there was no end to their fears, as one trantically declared that "she's sneakin' round to hit us in de back

Fear was not confined to the blacks alone, for many superstitions whites were certain that the day of judgment had

COMET'S TAIL SPLIT?

Is Now Hetween the Divisions

BLOOMINGTON, Ind., May 21.-That the balloon flight made from New England earth is now lying midway between two was made last night and to-day by the divisions of the tail of Halley's comet is Cleveland which ascended at North | the statement made in a telegram received Adams at 6.63 o'clock last night and to-day from the Johannesburg Observa- mechanical movement of the turbine and Johannesburg, South Africa, by Prof. W. A. Cogshall, head of the department of astronomy at Indiana University.

The telegram from the South African observatory told of observations there which found the comet's head and a tail ourteen degrees long on the western side of the earth, while at the same time a comprehensible portion of the tail was in the eastern sky. According to the astronomers these phenomena are di-tinet signs of the theory that the tail Amherst College, ascended in the balloon split and that the earth is lying in the split

Tall of It.

ATLANTIC CITY, N. J., May 21.-Thousands of people on the Boardwalk saw the comet to-night at 8 o'clock. It stayed in view for only a few minutes. It ap-peared as a nebulous gleam, without head tail being sharply defined

Comet on Hen's Nerves Too.

MONTGLAIR N. J. May 21 - Fireman James H. Banks of Hose Company 1. who lives at 57 Portland place, is the who lives at 57 Portland place, is the possessor of a comet egg. He has a Celtic, and said for himself that it was white wyandotte hen that laid a soft a little early to specufate about Demoshell egg with a five inch tail attached, cratic candidates for the Presidency two shell egg with a five inch tail attached. The tail is as thick as a man's finger and is crescent shaped.

Moon Outshines Comet.

PRINCETON, N. J., May 21. - The comet was visible in Princeton to-night at about 8:30, but no unusual observations were made. Mr. Daniel said that the moonlight was too bright and that nothing was seen except the nucleus as a round, hazy mass

LORIMER TO DEFEND HIMSELF.

for a Bribery Investigation.

CHICAGO, May 21. Senator Lorimer left for Washington this afternoon and the next word to come from him probfloor of the Senate defending himself It is understood he will confer tion. with some of his friends in the Illi Congress delegation and with some the Senators in whom he has confide of his friends in the Illinois and 'earn their opinion as to the advis-

ability of taking such a step.

If they approve the course he has decided upon the next move will be to wait the developments in court on next Tuesday when the case of Representative Lee O'Neil Browne, indicted on a bribery

lessors at that time would authorize a sustained and the case ordered to trial be was skylarking with Nicholas Dilcher, statement to that effect, but Prof. Wendeli it is considered probable that Mr. Lorimer a fellow workman, living at 684 Hudson will take the Senate into his confidence

Arbor observatory all have telegraphed.

Arbor observatory all have telegraphed.

Washington, May 21.—Senator Lorimer of the local astronomers that they saw the concer's tail on finday morning and their calculations have placed it in the same the Senate this week defending himself from the charges recently made against the tail was seen.

Prof. Wendell says that even now it is of members of the Illinois Legislature.

ENGINE INVENTOR PRAISED

DINNER WITH A WORKING OF THE DEVICE ON VIRW. Lawyer Herrick of Brooklyn Has Beer Working to Make Practical a Halanced Rotary Engine and He and His Friends Are Sure He Has Succeeded.

Gerardus Post Herrick, a Brooklyo engineers, representatives of contracting companies, ship building concerns and after 7 P. M. and railroads and electric and machine Astoria last night. They were there to congratulate Mr. Herrick on his invention of a practical rotary engine.

Among the guests were Prof. H. E. Clifford of Harvard, C. B. Edwards of the Fore River Shipbuilding Company, Edgar Freeman of the New York Central, C. A. Hamilton of the General Electric Company, Luther D. Lovekin of the New York Shipbuilding Company, E. T. Munger of the Hudson and Manhattan Railway Observations Made by the Astronomers Prof. Frederick L. Pryor of the Stevens Institute of Technology, Kunio Suda chief engineer of the Kawasaki Dockschedule time Halley's comet appeared yard Company of Kobe, Japan; Capt. to-night in the western sky, tail and A. B. Willets, U. S. N.; Everett Colby, clay Parsons and J. Vipond Daviees, chief

> A working model of Mr. Herrick's balanced rotary engine was on exhibition in an antercorn. For an hour before the dinner the engineers and representatives of machine companies gathered They wouldn't permit steam to be used in the Waldorf, so power was furnished by an electric motor. The engineers seemed to think that Mr. Herrick has evolved a rotary engine which is free from the defects of the type

> It was explained in the speechmaking that rotary engines have been pretty that rotary engines have been pretty much of a forlorn hope. They were interesting to tinker with and useful in small ways, but up to the present they had never been reliable or commercially practicable on any kind of a scale. Mr. Herrick and his friends, among whom were Prof. Pryor of the Stevens Institute and Luther! I have his chief engineer. and Luther D. Lovekin, chief engineer of the New York Shipbuilding Company, said that the Herrick engine has been carefully tested and that it has proved its

> Lovekin said that perhaps \$100,000, 000 has been spent by machinery people trying to evolve a satisfactory rotary. The chief obstacle had been that when steam was used to drive a piston in a circular course it exerted such pressure on the central bearing that either the engine refused to work at all under any

years in his laboratories at 33 Prospect street, Brooklyn, trying to find a means of overcoming this destructive friction. After many costly failures he finally discovered a method of using a film of steam one thirty-second of an inch thick to countertalance the cylinder pressure. This film of steam he introduced into a series of balancing chambers around the circumference of a cylindrical balancing plug which fitted between the bearings and the cylinder. The steam in the engine was made to counterbalance its

own pressure and drive the piston without nullifying its working force.

Mr. Lovekin believed that in a battle-ship like the North Dakota, with a speed of twenty-one knots, the Herrick engine, combined with the turbines, would add three-fourths of a knot an hour with the three-fourths of a knot an hour with the three-fourths of a knot an hour with the same boiler space and the same ceal consumption. He thought the engine would save from 20 to 25 per cent. in coal consumption if the battleship was driven at cruising speed only. If applied to vessels of the Mauretania type, the new rotary, Mr. Lovekin said, would increase the speed of the vessel wore than a knot ed of the yearel more than a knot an hour, reducing the transstlantic trip by about five hours. There would be also saving in boiler capacity and in coal. explaining the

of the park lakes with gondolas we have engine with its static pressure and limited metallic clearances is the result.

"As we said to Prof. Prvor of Stevens

Institute some years ago, when we first went to him for expert counsel: Before we are through we will either give the world a rotary engine or we will let the world know why a rotary engine is impossible. And this gathering is the fulfilment of that premise.

ROOT, GRAY AND BRYAN SAIL. The Senator May Go and See Col. Rooseveit in London.

Seldom on a May day have so many distinguished Americans started for Europe as sailed yesterday by the White Star liner Celtic, the Hamburg-American liner Kaiserin Auguste Victoria and the Red Star crack Lapland. All of them may get into communication by wireless to-day if they choose, and say many things that they were rejuctant to tell the re porters who saw them off yesterday. Judge George Gray of Delaware is a fellow passenger with William J. Bryan by the a family years hence. Col. Bryan said he believed that the Democratic party would get control of the next Congress and that he thought it wise to let a year elapse before discussing Democratic Presidential candi-

Senator Root said he expected the Hague conference would end in about three months. He is accompanied by Chandler Anderson, who prepared the fisheries case for the United States; George Turner of the State of Washington, Sam-uel J. Elder of Boston, James B. Scott, Solicitor of the State Department; Charles Warren of Detroit and Robert Lansing of Watertown. Chairman Griscom saw

It was said that the Senator expected leave the Lapland at Dover and meet

to leave the Lapland at Dover and meet Col. Roosevelt in London. The Lapland is due in Dover on Sunday.

Charles A. Conant, the banker, who sailed by the Kaiserin, is bound for The Hague to attend a conference on international bills of exchange; William H. Crane, the actor, who is on the Celtic, is going to London to talk with Charles Frohman to London to talk with Charles Frohman Color for hissaid.

HEART PIERCED BY NEEDLE. Freight Handler Killed While Skylacking With a Companion.

Arthur Devereaux, 26 years old, of 354 West Twenty-fourth atreet, Manhattan, was instantly killed in the Erie Railroad afternoon by having a six inch steel needle and could not get out. Entrance to the accidentally driven into his heart while store was forced from the rear and the perspiring merchant was released. avenue, West New York, N. J.

Both were members of a gang of freight handlers engaged in unloading bags of flour, and Devereaux was assigned to the reached over and tickled him in the rise. Disher involuntarily jumped backward, knocking Devereaux against a hag of flour on a truck. The needle was driven into Devereaux's heart and he fell, exclaiming "I'm stuck." He was picked up dead. Disher was griefstricken over the accident. He was not arrested.

Pedestrian Fires Four Shots Into It-Ad-

mits Taking "Dope." MUSROGEE, Okla., May 21.-A man in Western garb walked in front of a night and day bank here this afternoon and fired four shots into that institution, pausing two minutes after each shot, until 2,000 citizens gathered in the streets, most of whom, mistaking the man for a bank robber, sought safety. Finally Fred Woswell and Dr. Leo E. Bennett walked up behind the man and disarmed him, when he is reported to have shouted: "I am Price Macklin Taylor, not Henry

Starr. At the police station the prisoner gave his name as Price Macklin Taylor and is reported admitting he had been taking railroad travelling freight agent, it is said, but had been living hereabout some time.

Taylor had no money in the bank and was unknown to its officials. While he was shooting up the bank the customers and officials hid behind the counters Some of the customers were locked i the vault. One bullet struck the gilt sign at the top of the door and the others went through windows near the ceiling.

WHITE SLAVE HUNT IN SOUTH.

Man and Woman From New York in Nev Orleans Looking Into the Subject.

NEW OBLEANS, May 21 .- It was learned slave hunt of New York has extended to this city. Two detectives, a man and a woman, have been operating in the red journalist, indicating his companion, light district here for a week independent and to the relief of the delegates the lost of the local police. What they discoverd explorer was found. convinced the man detective, he says, that New Orleans is the most wicked Mrs. Wurts's Monday garden parties at city in the country. His comrade, a her villa on the Janiculum and the young college woman, refused to give Crowninshields' Tuesday receptions con-

many young women were brought here from Central America and Cuba and cent to New York and Chicago. After the discoveries in New York shut down on the market girls were sent there from Trieste and French ports. The detective said that scores of octoroons posing as white girls are sent from the country dis-tricts of Louisiana and Mississippi to Naples tricts of Louisiana and Mississippi to New York and Chicago. Most of these girls are of an unusual style of beauty and the demand for them is large.

The detective says that in the line of at Florence for the summer. investigation he is now following he has never encountered a worse red light system than in New Orleans. One of the system than in New Orleans. One of the peculiar features of his discovery here is that he found little actual white slave trading for New Orleans. Most of the procured girls are wanted for the North. He said that many octoroons are sent to

AMPLITATION IN BAGGAGE CAR. Afterward in Hospital.

old, a carpenter living in Bellmore, L. 1., Mr. Herrick in a speech explaining the workings of his engine said:

"As the Irishman advised for stocking the Long Island Railroad at the Bellmore the long Island Railroad at the long Island Rail station early yesteria' morning, he died nestanday afternoon in St. Marr's Howpital, Jamaica, whither he was removed that left Desi the accident and brought him into the Jamaica station. On the way from Bellmore he was bleed-

ing to death, when a telegram sent ahead brought a doctor to the station at Rockville Centre, who boarded the train and on the way to Jamaica amputated the right leg below the knee. There were a compound fracture of the left leg, a fracture of the elbow of the right arm and

MAYFLOWER DESCENDANTS Journey Up the Hudson to West Point -State Organizations Meet,

Of course the first thing that you will wish to know when you hear that the Mayflower Descendants went up to West Point yesterday is how they all got aboard one ship. But you see it was only the New York and New Jersey branches of the society that made the trip. There can be no shadow of doubt about the directness of the descent of those who took the Robert Fuiton for West Point early yesterday morning, for their papers have all the chief greater authority in the department than he ever had had before. He had enlarged his powers by turning over to his jurisdiction the Bureau of Auxiliary Appliances and Violations. The Commissioner added that in future there had no the chief were working in harmony and that from the beginning of his term as Commissioner will be chief were working in harmony and that from the beginning of his term as Commissioner he had given the chief were working in harmony and that from the beginning of his term as Commissioner he had given the chief were working in harmony and that from the beginning of his term as Commissioner he had given the chief were working in harmony and that from the beginning of his term as Commissioner he had given the chief greater authority in the department than he ever had had before.

The Commissioner Waldo said yesterday that he and the chief were working in harmony and that from the beginning of his term as Commissioner he had given the chief greater authority in the chief were working in harmony and that from the chief were working in harmony and that from the chief were working in harmony and that from the chief were working in harmony and that from the chief were working in harmony and that from the chief were working in harmony and that from the chief were working in harmony and that from the chief were working in harmony and th flower Descendants went up to West Point Elderly Man Bun Over by Train Dies Soon York and New Jersey branches of the spite the unusual measures taken to no shadow of doubt about the directness save the life of Richard Coward, 70 years of the descent of those who took the who had both legs crushed by a train of terday morning, for their papers have all the chief would have all the authority been acutely scrutinized by experts, including Historian-General Frank Rumill. who was one of yesterday's voyagers. from the train which picked him up after day morning, yawned clear up the river IN SAMUEL SPENCER'S MEMORY. to 129th street, adaptability to early morn ing hours not having descended unto the third and fourth generations. The mem-hers of the New Jersey society got to-

ovell governor for the coming year The Descendants didn't have the boar themselves by any means, as was obvious when the New York society decided to have their meeting opposite Yonkers. At one end the approach to the cabin was guarded by an imposing looking negro who held a pink and white ribbon across and stairs or whatever you call them on a boat. He was on the job all the while, which couldn't be said of the two deck-hands at the other end, who admitted picnic parties in to the precincts. One could hear, however, above the band which blatantly inquired for Kelly, that President Taft had lately been taken in to the Washington branch of the May flower Descendants Gov Frederick Chandler Seabury presided at this meet-

ing, which was almost immediately fol-lowed by luncheon. But just then the stern and rockbound oast of West Point was sighted and the Mayflowers, gathering what they could in the way of nourishment, hastened to make a landing. On the trip down on the Albany there were afternoon tea at 4 o'clock and a cooling breeze all the way, which wiped out any memory of discom-

> CROKER ON THE JOB AGAIN. Men With Soft Snaps Afraid Somethin May Happen to Them.

Chief Croker of the Fire Department ame back from Chicago late Friday night and denied the report that is cir-culated every!little while that he intended delivered power with great loss from her conclusions. She has kept her friction, or else it was rapidly and completely destroyed.

Mr. Herrick, he said worked for nine to resign. He had been reading before stitute the sole signs of any Americans being still in Rome.

Underwriters a paper on fighting fire.

Mr. and Mrs. Parrish, with their daughto resign. He had been reading before the Fire Commissioner were amicable There is good authority for saying that There is good authority for saying that no trouble has arisen so far between the Commissioner and the chief, but there are men in the department who are uneasy over their prospects. Commissioner Waldo has been abolishing soft snaps in the department. He found a number of able bodied men detailed to clerical work—even company commanders—and he has put them back on fire duty and put in the clerical places men partiy crippled. Princess Faustino, have taken a villa has put them back on fire duty and put in the clerical places men partly crippled in the service. It was not the latter who objected. There are a number of men that have been detailed at the chief's request and so far they have been im-mune. A rumor reached some of these men that they were to be sent back to work in quarters and they are said to have sent a hurry call to Chicago for the chief's return.

missioner Waldo said vesterday

conferred on him by law and that the Commissioner would too. These latter powers include the power to transfer

Statue of the Southern Railway's Late President Unveiled in Atlanta.

ATLANTA, Ga., May 21 .- A bronze statue gether, however, after the last city stop and had a little meeting in the after observation cabin, electing Leander N. of the Southern Railway, was unveiled this afternoon. It was presented to the city and State by 30,000 employees of the system. The cords were unloosed by Violet Energer the four-year-old grand daughter of the railroad met death in a wreck on his own system n November 29, 1906.

The esteem in which Mr. Spencer was held by employees of the system was attested by the attendance of hundreds representing all branches of the se J. W. Connally of Washington, hairman of the committee which raise he fund, following a prayer by Epis Bishop Nelson, told how the money had been secured, each of the 30,000 employees roluntarily contributing according J. S. B. Thompson, assistant to the

president, spoke in commendation of the spirit shown by the railway employees and was followed by President W. W. Finley of the Southern, who referred to the monument as "symbolizing the ideal relation between the manager of a railway and those who work under him." a railway and those who work under him Judge Alexander P. Humphrey, general counsel for the Southern Railway at Louisville, delivered the chief address Gov. Brown and Mayor Maddox received

henomena. Sunday Eve. at 8:15. yeeum, 7th Ave. and 57th St. SET TRAP FOR BLACK HANDER

And Caught Him After He Had Throw! Away Marked Bills and a Revolver. Black Hand letters have been coming Giacomo Cammarata, a grocer al 331 East Fourteenth street, ever since Christmas. The first one demanded \$5,000, but latterly the writer has expressed himself with being content with less. Cammarata go one on Friday which asked for only \$50

but the letter was so threatening that he went to Police Headquarters about it Detectives Gratano and Carnelli told the grocer how to manage the affair. He was to mark three \$1 bills, do them up in a nest package with strips of newspaper take them to the centre of Stuyvesant Park and hand them over just as was

written in the letter Gratano, Carnelli and four other men from the Central Office followed Cammarata to the park last night at a o'cloc corner of the square at First avenue and

made up of twenty-six persons, including at 434 East Fourteenth street B servants, and the cost of taking them to the revolver and the wadded packs were picked up.
